Entry-level Backend Software Engineer (Java) building secure, scalable backend systems, REST APIs, and event-driven services. Seeking a Backend/SDE role to apply strong DSA and system design fundamentals.

EXPERIENCE

Infosys

Nov. 2025 – Jan. 2026

Java Developer

Remote, India

- Developed **ParkEase**, a Smart Parking Management System (Spring Boot backend) with Admin and User modules for slot management and reservation.
- Implemented role-based authentication and authorization, ensuring secure access control and system integrity.
- Designed an Admin dashboard to manage slots, bookings, and user records, improving operational efficiency by an estimated **70%** and cutting parking search time by **50%**.
- Led a team of 7 members** during the **Infosys Springboard Virtual Internship**, coordinating planning and development to deliver ParkEase within the timeline.

JPMorgan Chase & Co

Sept. 2025

Software Engineering Intern (Forage Virtual Program)

Remote, India

- Completed the **JPMorgan Chase Advanced Software Engineering Virtual Experience (Forage)** by building **forage-midas**, a real-time financial transaction processing application.
- Developed **Apache Kafka** producer-consumer workflows for reliable event-driven communication and streaming data processing.

PROJECTS

Confidential Data Masker | Spring Boot, Tesseract OCR

- Built a Document Masker using Tesseract OCR to detect and redact PII from scanned documents, improving data privacy.
- Developed an OCR-based pipeline to identify and mask sensitive information, enabling secure document sharing.
- Exposed the masking pipeline via a Spring Boot REST API for document upload and processing.

Smart Risk Scoring Binaries | Python, YARA

- Developed a Smart Risk Scoring Binaries platform to analyze executables using static analysis, YARA rules, and ML-based risk scoring.
- Built an automated backend workflow to classify suspicious binaries and generate risk scores, improving threat prioritization for SOC analysts.

EDUCATION

KGISL Institute of Technology

Aug. 2023 – June 2027

Bachelor of Engineering in Computer Science

Coimbatore, India

- Coursework:** Data Structures, Algorithms, DBMS, Computer Systems, Machine Learning, Computer Networks.

SKILLS

Languages: Java, Python, SQL (MySQL)

Backend: Spring Boot, REST APIs, Node.js (basic)

Database: MySQL, MongoDB

Tools: GitHub, Git, Postman, Docker, Windows, Linux, Tesseract OCR, Networking Tools

Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), System Design Basics

CERTIFICATIONS

JPMorgan Chase Advanced Software Engineering Virtual Experience (Forage) | Infosys Springboard Virtual Internship
